COMMENTS

Reasons For Allowance

The following is an examiner's statement of reasons for allowance: the independent claim defines a guard mechanism for sewing machines for stabilizing needles during a sewing procedure. The guard mechanism comprises a needle guard having a front needle guard and a rear needle guard. The rear guard is movable and attached to a movable member and the front guard straddles the top section of the movable member and swings reciprocally. A transmission mechanism is provided including a main axle, a direction switching mechanism and a linkage mechanism. The main axle provides a rotational force, which is transformed to reciprocal motion by the direction switching mechanism and where the linkage mechanism transfers the driving force to the needle guard. The dependent claims further limit the device of the independent claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
